COMPETITIVE AIRPORT CONCESSION GOOD NEWS FOR KOSOVO'S ECONOMIC DEVELOPMENT - ICR

The International Civilian Representative (ICR), Pieter Feith, today commented on the concession of Pristina International Airport finalised yesterday.

Mr Feith said:

“I am pleased to learn about the result and process of the tender of the concession of Pristina International Airport.

“In particular, it is important to note that the process was competitive until the end. The outcome shows that well-designed investment opportunities in Kosovo can be attractive for large, reputable foreign investors.

“This is the first step in the privatisation of the Public Owned Enterprises, an important structural reform that can stimulate growth and improve the competitiveness of the economy of Kosovo – which in turn can benefit all citizens of Kosovo.

“The success of this process can now serve as an example for forthcoming important transactions, including the privatisation of PTK and the New Kosovo energy project.”
